About Me

A passionate data scientist with expertise in machine learning, data analytics, and business intelligence, dedicated to transforming complex data into actionable insights. With experience in building high-accuracy AI models, optimizing time-series forecasting, and automating data pipelines, the focus remains on enhancing operational efficiency and driving business impact. Having worked across industries in roles that involved predictive modeling, data visualization, and cloud technologies, there is a strong commitment to leveraging data for informed decision-making. Beyond analytics, interests extend to AI in IoT, aerospace, and content creation, constantly exploring innovative solutions to real-world challenges.

Profile:	Data Science & Analytics
Education:	Master of Science in Computer Science
Language:	English, Hindi
BI Tools:	Microsoft Power BI, Looker & Tableau
Other Skills:	Cloud, PySpark, Excel, Git, JIRA, Google Analytics & SEO
Interest:	Traveling, Content Creation, Event Management

30 + Projects completed

Resume

Experienced Senior Data Analyst with over three years of expertise in leveraging data-driven insights to shape business strategies. Skilled in data science, statistical analysis, machine learning algorithms, and project management, with a strong track record of optimizing processes and enhancing decision-making through advanced analytics.

Experience

2023-2024

Global Ambasador-Media Analyst

CLEVELAND STATE GLOBAL

Cleveland State Global, a partnership between CSU and Shorelight, offers international students specialized admissions, academic support, and career development opportunities.

- Produced and Curated over 80 video series showcasing campus events and student achievements, resulting in a 70% increase in engagement and fostering community growth
- Streamlined orientation processes for international students, welcomed over 700 international students in Fall 23 reducing onboarding time through better communication and increasing student satisfaction scores by 95%

2022-2023

Senior Data Analyst

ADANI PORTS AND SEZ LTD

Adani Ports and SEZ Ltd., India's largest commercial ports operator, manages 13 ports across seven states, handling nearly a quarter of the country's cargo with advanced infrastructure and connectivity.

- Optimized financial analysis of Ship Reports for 70+ vessels by cleaning and structuring data, enhancing budget maintenance key performance indicators (KPIs), and improving user-friendliness by 15% , contributing to sustainable business growth.
- Led a solution development team for centralized data storage and real-time ship monitoring, optimizing maintenance tracking and providing sustainable transportation solutions.

2021-2022

Data Scientist

SRI SRI TECH

Srisritech India Pvt. Ltd., part of the SST global network, provides consulting in finance, technology, operations, governance, risk, and internal audit.

- Enhanced the ARIMA model by 10% through hyperparameter tuning, resulting in more data quality and accurate time series forecasting for the client's business planning.
- Designed workflow orchestration tools using Apache Airflow to automate data pipelines, reducing manual interventions and improving operational efficiency.
- Managed the creation, modification and presentation of monthly reports, reducing reporting time by 25% and improving decision-making.

2020-2021

Senior Data Analyst

ECLERX

eClerx is a multinational IT consulting and outsourcing company specializing in business process management, automation, and analytics, publicly listed on India's stock exchanges.

- Designed and maintained sales dashboards and reports, improving overall performance in MS excel using vlookp pivot table and vba .
- Implemented workflow automation for the weekly marketing report process in Power BI by scheduling data uploads and integrating Toad plug-ins, reducing manual reporting efforts by 40%.
- Optimized SQL queries for back-end data in multiple ad-hoc reports, verify accurate data visualization and reduce processing time.

Education

2023-2024

Master of Science in Computer Science

CLEVELAND STATE UNIVERSITY

2016-2020

Bachelor of Engineering in Computer Science

GUJARAT TECHNOLOGICAL UNIVERSITY

Projects

Below are my some work based on Data Science projects on SQL, Python, Power BI & ML.

Cherry Tone - Internet Of intelligence things

Developed a facial recognition system on Raspberry Pi that enables seamless communication between heterogeneous IoT devices through a central server, allowing data sharing and collaborative task execution.

Bank Marketing Prediction

Conducted exploratory data analysis and built regression and random forest models to predict marketing campaign success, enabling data-driven optimization of financial institution strategies.

Text-To-Image by Stable Diffusion

Implemented a text-to-image generation system using Stable Diffusion in Python, leveraging deep learning for high-quality image synthesis from textual descriptions.

Pharma Product Sales Forecasting

Developed a pharmaceutical sales forecasting model using ARIMA to predict product demand over time, enabling data-driven inventory and supply chain management.

Credit Card Financial Dashboard

An interactive Credit Card Financial Dashboard using Power BI, SQL, and DAX to uncover insights on revenue, customer behavior, and spending trends.
